DINO CRISIS

REGINA'S CAVEWOMAN OUTFIT

When you finish the game for first time, Regina will get two new costumes – battle and army. If you play through the game twice, you'll get a fourth outfit for Regina to wear. It will change her into a cave girl. A bonus for getting this is that if you check her guns at your equip menu, they'll have turned into ancient type weapons. They'll still function like normal, though.

INFINITE GRENADE AMMO

When you have seen all three endings to *Dino Crisis* (you've got to play three separate games from start to finish). Regina not only starts with a grenade gun, but she also has unlimited ammunition.

D.D.K DOOR LOCKS

To open the DDK doors use the 'H' disks, then to find the DDK password simply take away the key letters from the code letters. For example, if the code is HBCEFAGDI and the key is BCFGI, take BCFGI away from HBCEFAGDI to get the password HEAD.

PORT DOOR CODE

The password's WATERWAY. If you've got the DDKs you're sorted.

OPEN OPERATION WIPEOUT

If you beat the game on normal in under five hours, it will unlock a sub-game called Operation Wipeout. In this sub-game you have to kill all the Dinos in under the given time. You only get a limited amount of ammo.

BONUS OUTFITS

If you beat the game in under eight hours, you'll get new costumes to wear.

FINAL FANTASY 7

UMBRELLA WEAPON

On disc one, Aeris can nab an odd umbrella weapon. You'll need to get 5000 points on the shooting coaster, in the Gold Saucer. Playing Super Dunk is a good way to get GP to afford all the games you'll need on the

coaster to get them points. The umbrella is Aeris' second hardest weapon, so it's worth going for.

CHOCOBOS

You get to the end, only to find you need a gold chocobo to get the Knights of the Round materia, eh? The best areas to look for top chocobos are the ice area (They are there...try harder!), the Mideel island in the south and the area around Rocket town.

THIEVING BITCH

The only way to get back your materia when Yuffie has stolen it is to ring the bell in Wutai, after you get out of the cage, to open a hidden door. Through there is where you'll get the materia back. Yuffie gives it back to you in a random order, so re-equip it.

PANDORA'S BOX

Pandora's box is a massive enemy skill, doing loads of damage to all targets. You pick it up in the crater, at the end of the game. When you fight the zombie dragon, you should get it. Use a variety of attacks and eventually he'll use it on you.

KNOCKOUT KINGS

BEATING OPPONENTS

This method only works when you're fighting in the career mode. What you've got to do is knock your opponent down. The trick is to press start and throw the towel in at almost exactly the same time as you knock the other person out.

If you get your timing right the computer will think your opponent's thrown his towel in, instead of you. It'll continue the countdown, meaning you'll be awarded a technical knockout.

It's in the dark passage to the right of the cave. Light a flare and jump

forward over a ramp to grab it. Before getting the Talion, drop down to the ice field and head for the ladder near the far left corner. Jump over to grab it, climb down, light a flare and then turn left. Drop down to a platform, turn around to find a switch. Hit it to open the hut near the palace. Climb back up the ladder and jump back to the ice field. Now head for the hut to find the secret. As you slide down the first waterfall, do a mid-air roll to slide backwards. Grab the edge of the waterfall, shimmy left, and pull up to find the secret. Don't drop from the first ladder to grab the secret ledge, as you'll fall into the lava and die. From the low walkway, shimmy along the crevice to reach the secret.
Climb to the right and slide down onto the springboard. Push forward in the air to land on a rafter. Turn right and do a running jump to grab the ledge with the secret. From here, you can jump back to a ledge and onto the slope.

COMMAND & CONQUER: TIBERIAN SUN

ARTILLERY TRICKS

If you are playing a Multiplayer Skirmish, build up about 10-20 artillery. Take them into the enemy base(s), deploy them, and reek havoc on the enemy base. If the enemy is Nod and they have a Stealth Generator, Bring in a Mobile Sensor Array along with the artillery.

CIVILIAN VEHICLES

If you have a Mutant Hijacker, you can steal civilian vehicles. Listed below is the amount of infantry each one can carry.

VEHICLE	INFANTRY
Automobile	4
Pickup	2
RV	4
School Bus	20

DEMOLITION TRUCK

Take a harvester and fill it with blue tiberium, then put it in your enemy's base. Put it beside a building and then when they destroy it, it will blow up the building.

DISC THROWER TRICKS

Send a group of D.T's and place them just out of the range of a laser/component tower and line them up with the defense structure. Force fire in front of structure and the disks will bounce into it. Even though its not as accurate, the laser/tower won't shoot you. You can use this in many situations to increase the attack range of your Disc Throwers.

Tell a Disc thrower to force fire someplace. Then when he is about to throw tell him to fire across the map and he Will. Those Arms must really be good.

FREE GDI REPAIRS ON UPGRADEABLE BUILDINGS

When playing as GDI, you can build structures that can be upgraded, ie. power plants. If a structure that can be upgraded is damaged and you build the add-on for that structure, ie. power turbine, the structure will be fully repaired. The only money that you will lose is the money that you spent on the upgrade.

INFINITE FIRESTORM WALL

If you have a firestorm wall and it is fully charged, you can make it last forever without having to turn it off to charge. First charge your wall fully, then turn it on. Before it turns off or runs out of power sell or turn off your power plants until the words "On Hold" appear in the firestorm Icon. Your wall will stay on forever and will not run out of power until you build or turn on your power plants. This does not work if you install patch ver. 1.11

KILL A CYBORG COMMANDO IN ONE HIT

If you want to kill a Cyborg Commando, with out losing all of your units, there is a very simple way to do it. You have to be able to build a GDI Firestorm Wall Generator, and Firestorm wall sections. First fortify your base and build it up until you have the option to build a Firestorm wall, and sections, then build firestorm walls across any sections where an enemy can get into your base. When a Cyborg Commando is over one of the sections turn the Firestorm generator on and Blam! All of your problems are solved.

MISSILE DEFENSE TACTICS

When playing as GDI, build a Firestorm generator and Firestorm wall sections but do not turn them on yet. When your opponent launches a Multi-missile at your base, turn on the Firestorm defense. The Missle should disintegrate. However,a HUNTER SEEKER drone will overload the generator and the defense will have to recharge. This trick doesn't work with chemical missiles. You can stop the creation of those by killing that weird thing at the center of a vein field, though .This will cause the creation of veins to reverse.

ONE-HIT KILLS

When playing as NOD, if you have the laser fence sections you can kill any unit one hit. Set up two laser sections as you would normaly. Turn one of them off with the lightning icon thing. When a unit passes between the fences turn it back on. Any unit, even the Mammoth mk2 is destroyed. This is very effective in multiplayer if there are alot of bridges.

SPECIAL GDI ENDING

Leave the NOD's "Temple of NOD" until the very end and make sure your ion cannon destroys it. You will get the special ending.

Return to the hotel and talk to the hotel manager behind the desk. He will give you the presidential key which you can use to open the locked door on the first floor.

WHACKING JAWS AT THE JUNKYARD

To defeat Jaws in the Russian junkyard you must first get to the house. When you walk in you'll see four plates to step on which power the big magnets at the back of the room. Step on the plates and the magnets will push out. Jaws will follow you everywhere you go, so when you lead him to a magnet he will be stuck for a few seconds, giving you time to wipe him out.

FINDING THE M.A.R.B.L.E.

The first time you talk to Q, there is a man in a chair behind him. If you walk around the chair hitting A or B the chair will launch through the wall. Walk through the hole in the wall to get the M.A.R.B.L.E.

GET JEWELED EGG

In Kurdistan, go to the entrance and fight Iqbal. Chop down the bush to your right. Where that bush was, walk into the rocks, and carry on over them. Walk over once, down until you can't move anymore, and over again, until you reach a room with a lot of bushes, five health pick-ups and a man. Talk to the man and he will give you a jeweled egg, which you can trade for an underground pass in Marrakech.

GETTING THE PASS IN KURDISTAN

Enter the house with the two big block things around it. If the man says "Good-day" it didnt work - you'll need something out of the list of supplies. If you get him to say something else get the ring from him, find the prisoner, and show him the ring. He will ask you to get some paper from the furthest house north. Return with paper and he'll give you the pass.

HIDDEN HAMMER

To get the hammer, go to the house on the left side of your screen when you start the game. Enter that house, go to the back bed and hit it.

R-TYPE DX

INVINCIBILITY

For invincibility, complete R-Type DX using no more than 10 credits. Then, during a non-DX game, press Select + A.

BOSS-BEATING

On the first boss all you need is a pod. Wait until he moves his tail, then shoot your pod into the middle to hit him. Repeat until he dies.

For the second boss you'll also need a pod. When you come into the boss screen, try to fire your pod next to the opening at the top. Go to the bottom lefthand side, get low to the ground and as close as you can to the plant. Now call your pod back to you and it should be stuck in the bosses hole. Stay where you are and the boss should never touch you. It doesn't look like you're hurting him, but stay put and he'll eventually die.

RESTART LEVEL

To restart the level you're playing, hold B and turn the power switch to 'Off'. While continuing to hold B, turn it back on again. The game will begin again at the beginning of the last level played, with five ships but no points or power-ups.

SUPER-BLAST

To destroy almost every enemy on the screen, you must be playing R-Type II and have the largest pod attached to your ship. Charge your beam meter and, prior to letting rip with the mega-blast, deploy the pod. Now release the fire button and tap it repeatedly.
